

Kurhei Uladzislau

Unity Game Developer

Minsk, BY | +375 29 535 00 25 | lakey38015@gmail.com | [Linkedin](#)

Summary

Unity Developer with **5 years** of experience in game development. Specializing in gameplay programming, performance optimization, UI/UX implementation and team management. Handled the full-cycle development and publication of a game on Steam, Google Play and AppStore. Experienced in implementing a wide range of gameplay mechanics in fast prototypes or long-term development and iteration of complex systems. Portfolio with developed games and other projects is available here: [PORTFOLIO](#).

Skills

- Unity Engine: 2D/3D, UI (Canvas), prefabs, physics, scene management, coroutines, ScriptableObjects, NavMesh (AI navigation), Animator (state machines, transitions, blend trees), Dependency Injection (VContainer), DoTween, PrimeTween, Cinemachine
- C# Programming: OOP, architecture patterns, async (UniTask), delegates/events, LINQ, System.IO, Generics
- Architecture & Systems: Game architecture design (modular systems, scalable gameplay logic), Event-driven game architecture, Data-driven systems and remote configuration, Unity DOTS (basics)
- UI Development: Unity UI (Canvas), UI states, transitions, animations, UX flow implementation
- Graphics & VFX: particle systems (VFX), lighting setup, post-processing effects, scene visual polishing, Shaders (ShaderGraph, HLSL)
- Editor tools developing: UnityEditor, Alchemy, Reflection, Attributes
- Multiplayer gameplay: Mirror and FishNet (basics), RPC, Syncing
- Build & Asset Management: Addressables, AssetBundles, Runtime loading, Build size reduction and Memory optimization
- Debugging and optimization: Profiler, Frame-debugger, Memory Profiling, IDE debugging
- Version Control: Git, GitHub, Fork
- Publishing: Steam (Steamworks API, distribution), Google Play, App Store (Xcode builds, TestFlight distribution)
- Monetization: Ad integration (MAX mediation, Applovin, Appodeal, custom networks), In-app purchases (Unity purchasing)
- Analytics: GameAnalytics, AppMetrica, Bytebrew, Facebook SDK
- Side tools: Visual Studio, Blender, Illustrator, Substance Painter, Premier Pro, Photoshop, FL Studio
- Soft Skills: Team leadership, Task tracking (Trello), Fast learning, Creativity, Ability to work autonomously with minimal direction

Experience

Unity Game Developer / Self-Employed

Okiddy Games - Minsk, Belarus

Aug 2025 - Present

- Built casual mobile games with friends, including "[Hook Stars](#)", "[Battle Warriors](#)"
- Solo-developed "[Wheel Balance](#)" for PC (Steam)
- Executed organic marketing strategies through video production and community outreach to grow the player base
- Acquired deep knowledge of the Steamworks ecosystem and publishing pipeline
- Developed and published Unity packages for the Asset Store
- Participated in game development exhibitions, conferences and industry events, presenting "Wheel Balance" and connecting with other developers
- Explored and researched multiplayer frameworks for game development

Unity Game Developer

PandaPlay (MyDirectGames) - Minsk, Belarus (remote)

Mar 2021 - Aug 2025

- Built casual mobile games in a small team
- Implemented core game mechanics, UI flow, and user feedback elements
- Participated in gameplay ideation
- Handled full stack of analytics SDKs across projects (MAX, AppsFlyer, GameAnalytics, AppMetrica)
- Built and maintained base project for games across the team
- Developed and Published "[Guns Factory](#)", "[PinBullet](#)", "[Soccer Strike](#)" along with over 30 other titles.
- Integrated SDK, Ads and IAP for publishers ("AZUR GAMES", "Homa", "SayGames", "Lion Studios", "Voodoo")
- Maintained "[Emoji Guess Puzzle](#)" (5M + downloads on Google Play)
- Focused on rapid prototyping of 2D PvP/PvE mobile games
- Built and maintained reused modules
